Simplify Your Path To Financial Security With The American Freedom Classic 3

A fixed annuity that offers:

Predictable growth

To help build your retirement savings, your annuity's interest rate is guaranteed over two three-year periods. No matter how the market performs, the value of your annuity will grow at a steady rate.

Safety of principal

Regardless of market conditions, you won't lose the money you contribute to your annuity unless you take a withdrawal or surrender your contract during its early withdrawal charge period.

Guaranteed retirement income

When you're ready to turn the money you've accumulated in your annuity into retirement income, you can select from a variety of payout options, including an income stream that will last for the rest of your life.

Annuity Basics

Simply put, an annuity is a contract between you and an insurance company. It is a long-term financial vehicle that's designed to protect and grow your money, and then provide a stream of income during your retirement. In fact, other than pensions, **annuities are the only products that provide guaranteed lifetime income.**

Great American Insurance Group is committed to offering annuities that are simpler and easier to understand – helping to achieve your goals with no surprises.

How Your Money Grows

To help build your retirement savings, the American Freedom ClassicSM 3 offers interest rates that are guaranteed for three-year periods. Each three-year period is called a term. The American Freedom Classic 3 has two terms.

How it works

When you purchase your annuity, the initial interest rate is guaranteed for the first term. Near the end of contract year three, we will set a new interest rate for the second term. The new interest rate may be higher or lower than the interest rate in years one through three, but it will never be lower than your annuity's guaranteed minimum interest rate.

Hypothetical example

Before the second term begins, you will receive a letter with your new interest rate. At this time, you can choose to surrender your annuity without incurring an early withdrawal charge or start a second term. It's as simple as that.

What Is The Benefit Of Tax-Deferred Growth?

One of the benefits of an annuity is the opportunity for your money to grow tax deferred. This means no taxes are paid until you take a withdrawal, so your money can grow at a faster rate than it would in a taxable product.

The following chart shows how a purchase payment of \$100,000 grows in a tax-deferred annuity compared to a taxable product over the course of 20 years.

After paying a 25% tax on its earnings, the tax-deferred annuity outgrew the taxable product by more than \$8,000.

This graph assumes a \$100,000 non-qualified investment, accumulated for 20 years, with a 4% annual growth rate. Lower capital gains and dividend tax rates would make the taxable investment more favorable than the rate illustrated and reduce the difference in performance between these accounts. Consider your current and anticipated tax brackets in making your decision, as they may also impact comparison results. The amount of tax-deferred accumulation would be reduced if early withdrawal charges were reflected. This is a hypothetical scenario for illustration purposes only, and does not necessarily reflect growth rates of products offered by Great American Life.

This information is not intended or written to be used as legal or tax advice. It was written solely to provide general information and support the sale of annuity products. You should seek advice on legal or tax questions based on your particular circumstances from an attorney or tax advisor.

The graph compares a \$100,000 taxable investment to a \$100,000 tax-deferred investment, such as a non-qualified annuity. Certain qualified investments, such as a traditional IRA, offer an upfront tax deduction or exclusion for contributions. Other qualified investments, such as a Roth IRA, offer a tax exclusion for earnings. The value of these additional benefits is not illustrated.

For contracts that offer an upfront tax deduction or exclusion, the full amount withdrawn is generally subject to income tax. For a non-qualified annuity, only the gains are subject to income tax. If you are under age 59½, the taxable amount withdrawn from a qualified or non-qualified annuity is generally subject to a 10% federal penalty tax.

Additional Benefits

Guaranteed retirement income

With the average retirement lasting 18 years, you may worry about outliving your savings. The American Freedom ClassicSM 3 provides the opportunity to turn the money you've accumulated in your annuity into a steady stream of retirement income. Depending on which payout option you choose, income benefit payments are made for a specific number of years or for life.

Protection for your loved ones

No one likes to think about it, but part of achieving peace of mind is knowing what would happen to your money if you pass away unexpectedly. With the American Freedom Classic 3, any death benefit is paid directly to your beneficiaries, which allows them to receive your financial legacy without the cost and delays of probate.

Consider Your Liquidity Needs

The American Freedom ClassicSM 3 is intended to be a long-term product. However, you will have access to a portion of your money each year with penalty-free withdrawals.

During the first contract year, you may withdraw up to 10% of your purchase payments. After the first contract year, 10% of the account value on the most recent contract anniversary may be withdrawn.

It's important to note withdrawals in excess of this amount may be subject to **early withdrawal charges**. Early withdrawal charges end after six years.

Remember, if you choose to walk away from your annuity at the end of the first three-year term, we will waive early withdrawal charges.
