Fixed Index Annuities are not a direct investment in the stock market. They are long-term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. Although Fixed Index Annuities guarantee no loss of premium due to market downturns, deductions from your Accumulation Value for additional optional benefit riders could under certain scenarios exceed interest credited to your Accumulation Value, which would result in loss of premium. They may not be appropriate for all clients.

The term financial professional is not intended to imply engagement in an advisory business in which compensation is not related to sales. Financial professionals that are insurance licensed will be paid a commission on the sale of an insurance product.
