

See how your financial future adds up

Preparing for a secure financial future involves finding a product that can help you reach your goals. Two factors that determine how much money you accumulate are your **time horizon** and the **credited interest rate**.

The following table shows how a **\$100,000** purchase payment would grow at various interest rates and time periods.

Credited rate	End of year account value					
	3 years	5 years	6 years	7 years	8 years	10 years
