#### Market Value Adjustment

A market value adjustment applies to withdrawals or surrenders that are subject to a surrender charge. We base the adjustment on a formula that takes into account changes in the MVA Index at that time. We will waive the MVA when the surrender charge is waived.

The MVA can increase or decrease the surrender value of the annuity. Generally, if interest rates have risen since the beginning of the current surrender-charge period, the MVA will decrease the surrender value. If interest rates have fallen, the MVA will increase the surrender value.

#### Time to Reflect on the Purchase

You – the owner – may cancel and return your contract within 30 days after it is delivered to you. We will refund your premium after a cancellation, minus any withdrawals you've taken.
