The values shown are for example only and assume no withdrawals during the surrender-charge periods; actual results and crediting rates will vary. Fund value less surrender charge is not the surrender value; a market value adjustment also applies. The MVA can increase or decrease the surrender value. The minimum guaranteed surrender value reflects the maximum possible adverse impact of the MVA. The Standard is not responsible for the accuracy or completeness of the information you input.

Year-by-Year Breakdown

Year 1 to 7

- For the first seven contract years, we guarantee the annual interest rate that was in effect when you bought the annuity.

Year 8 and after

- A new seven-year interest rate guarantee period and surrender-charge period automatically begin at the end of the seventh year, and again at the end of each seven-year period.¹ During the first 30 days of each seven-year period, you may withdraw some or all of your funds without a surrender charge or market value adjustment.
- The Standard sets a new interest rate at the beginning of each seven-year period, and we guarantee the rate for seven contract years. The new rate may be higher or lower than the interest rate in years one through seven.

Understanding Key Features

Surrender-Charge Periods

Withdrawals and surrenders may face a charge during each surrender-charge period. This is calculated as a percentage of the withdrawal amount. At the end of each guarantee period, a new interest rate guarantee period and surrender-charge period automatically begin.¹ During the first 30 days of each subsequent surrender-charge period, you may withdraw some or all of your funds without a surrender charge.

Year in Surrender-Charge Period	1	2	3	4	5	6	7
Surrender Charge	9.4%	8.5%	7.5%	6.5%	5.5%	4.5%	3.5%

We waive surrender charges for:

- First 30 days of each subsequent surrender-charge period
- Scheduled payments of interest earnings
- Required minimum distributions
- Terminal conditions²
- Nursing home residency²
- Annuitization
- Death benefits

Market Value Adjustment

A market value adjustment applies to withdrawals or surrenders that are subject to a surrender charge. We base the adjustment on a formula that takes into account changes in the MVA Index at that time. We will waive the MVA when the surrender charge is waived.

The MVA can increase or decrease the surrender value of the annuity. Generally, if interest rates have risen since the beginning of the current surrender-charge period, the MVA will decrease the surrender value. If interest rates have fallen, the MVA will increase the surrender value.
